## For the First Time \$500 Buys a Closed Car

If you plan to spend over \$500 F. O. B. Factory for an automobile, you can get the year-round comfort and convenience of a Ford closed car.

The price advantage which the public enjoys in purchasing Ford cars is the result of volume production. In 1920, when the Ford Motor Company was producing approximately only a million cars a year, the Ford Touring Car sold for \$575. Today, with production on the basis of nearly two million cars a year, the Tudor Sedan, a high quality all-steel closed car, can be purchased for \$520—\$55 less than the Touring Car sold for six years ago. Open car prices are correspondingly low.

While this program of price reduction has been carried on, important refinements and improvements have been made in Ford cars. The latest improvements include new and attractive body lines—a lower center of gravity, closed cars in color, all-steel bodies, new brakes and new style fenders.

However, the basic features of Ford design have not been changed. Three point motor suspension, planetary transmission, dual ignition system, torque tube drive, multiple disc-in-oil clutch, splash lubrication, thermo-syphon cooling system—outstanding features of automobile design—have all been retained, regardless of cost.
